

MODEL SFI
SIGHT FLOW INDICATOR

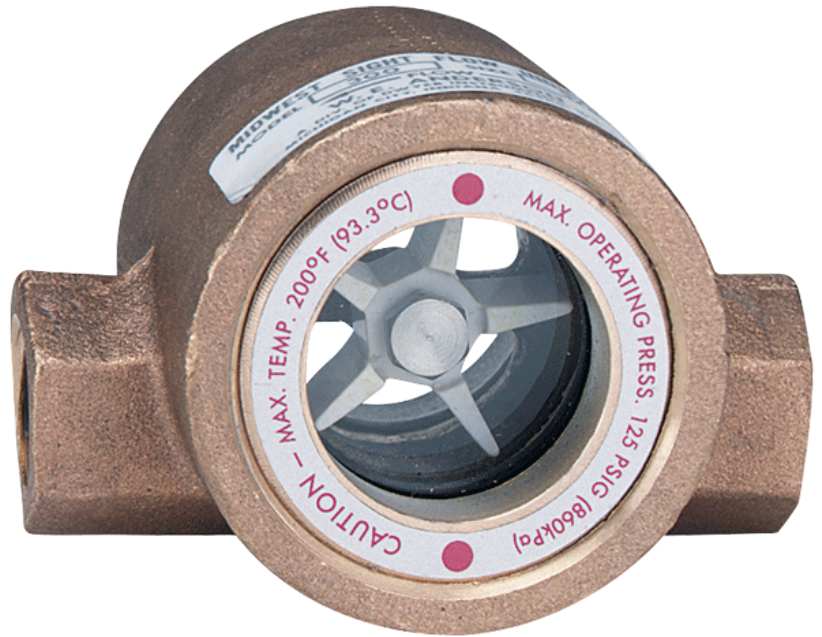

Model SFI Sight Flow Indicator

Sight flow indicators are used to provide a visual indication of the flow. By checking the spin speed of the indicator the user will get a relative idea of the flow rate.

These units are designed for use with fuel oil (diesel).

Specifications:

- Bronze Body
- Tempered glass window on both sides
- Fluoroelastomer gasket
- ABS Indicator
- Temperature limit: 200 degree F
- Pressure limit: 150 psi
- Mounting Options: Horizontal or Vertical
