

DATA SHEET

MODEL PLS  
BASE PAN LEAK SWITCH

Critical  
Fuel Systems  
*A division of BFS Industries, LLC*

Leak Switches are used to detect the presence of oil which may have spilled or leaked. A typical application would be to detect oil that has leaked into the base pan of a pump set.

These units are designed for use with fuel oil (diesel).

**Specifications:**

- Mounting - 1" NPT
- Stem Material - Brass
- Float Material – Buna N
- Switch Type: 50VA SPST
- Enclosure: Electrical Box
- Temperature Range: -40 to 180 degrees F
- Specific Gravity is selected to match requirements of Diesel Fuel (No. 2 Fuel Oil)
- Electrical Connection: 22AWG leads with terminal block

Subject to change at any time without notice

PLS-08-16 Rev. A
